Enterprise Performance Management System
Version: 1.0.0

Project Path: D:\CDC\PMS\pms-platform
Report Generated: February 03, 2026

Days Completed: 4 of 30
Overall Progress: 13%
Release Gate Status: PASS

1. Executive Summary

Project Overview

The PMS Platform is an enterprise-grade Performance Management System designed to compete with industry leaders like Workday, SAP SuccessFactors, and Oracle HCM. After 4 days of intensive development, the foundation is complete with 88/88 enterprise parity checklist items passing.

Key Achievements (Days 1-4)

• Multi-tenant architecture with 50+ database models

• 13 API modules with 100+ endpoints

• 12-pattern bias detection engine

• Real-time WebSocket infrastructure with 72 event types

• React frontend with dashboard, goals, reviews, and analytics pages

• Release gate passed - ready for deployment

Remaining Work (Days 5-30)

• Monitoring infrastructure (hourly, daily, weekly, monthly, yearly)

• Advanced visualization framework (Gantt, timelines, calendars, heatmaps)

• 20+ analytics tools implementation

• Executive, manager, and employee dashboards

• Integration with external services (email, Slack, HRIS)

• Production deployment and documentation

---

2. Current Repository Status

Technology Stack

Layer	Technology	Version
Backend Runtime	Node.js	20 (Alpine)
Backend Framework	Express.js	4.18.2
Language	TypeScript	5.3.3
Database	PostgreSQL	14+
ORM	Prisma	5.8.0
Cache	Redis	7+
Frontend	React	18.2.0
Build Tool	Vite	7.3.1
Styling	Tailwind CSS	3.4.1
State Management	Zustand	4.4.7
Charts	Recharts	2.10.4
Testing	Jest + Vitest	29.7.0

---

3. Progress Report (Days 1-4)

Day 1: Project Foundation & Architecture

Date: Feb 2, 2026

Item	Files/Modules	Type
Monorepo structure initialized with Turborepo	package.json, turbo.json	Infrastructure
Multi-tenant database schema designed (50+ models)	packages/database/prisma/schema.prisma	Database
Initial database migration created	packages/database/prisma/migrations/20260202002237_init/	Database
Core business logic package structure	packages/core/src/index.ts, packages/core/src/constants.ts	Architecture
Docker infrastructure setup	infrastructure/docker/docker-compose.yml, Dockerfile.api	DevOps

Day 2: API Module Implementation
Date: Feb 3, 2026

Item	Files/Modules	Type
Authentication module with JWT & MFA support	apps/api/src/modules/auth/	Backend
Users module with org chart & reporting lines	apps/api/src/modules/users/	Backend
Goals module with OKR support	apps/api/src/modules/goals/	Backend
Reviews module with cycle management	apps/api/src/modules/reviews/	Backend
Feedback module with continuous feedback	apps/api/src/modules/feedback/	Backend
Calibration module with bias alerts	apps/api/src/modules/calibration/	Backend

Day 3: Core Algorithms & Advanced Features
Date: Feb 4, 2026

| Item	Files/Modules	Type
Bias detection engine (12 patterns)	packages/core/src/bias-detection.ts	Algorithm
Calibration assistant with outlier detection	packages/core/src/calibration-assistant.ts	Algorithm
Explainable promotion engine	packages/core/src/explainable-promotion-engine.ts	Algorithm
Goal alignment & early warning system	packages/core/src/goal-alignment.ts, packages/core/src/goal-early-warning.ts	Algorithm
Evidence API module	apps/api/src/modules/evidence/	Backend
Compensation API module	apps/api/src/modules/compensation/	Backend
Promotion API module	apps/api/src/modules/promotion/	Backend

Day 4: Frontend & Integration Layer
Date: Feb 5, 2026

Item	Files/Modules	Type
React web application with Vite	apps/web/src/main.tsx, apps/web/package.json	Frontend
Dashboard page with KPI widgets	apps/web/src/pages/DashboardPage.tsx	Frontend
Goals management pages	apps/web/src/pages/goals/GoalsPage.tsx, apps/web/src/pages/goals/GoalDetailPage.tsx	Frontend
Reviews pages	apps/web/src/pages/reviews/ReviewsPage.tsx, apps/web/src/pages/reviews/ReviewDetailPage.tsx	Frontend
Analytics page with charts	apps/web/src/pages/analytics/AnalyticsPage.tsx	Frontend
Real-time WebSocket infrastructure	packages/core/src/realtime-websocket.ts, packages/core/src/websocket/server.ts	Infrastructure
72 event types across 9 domains	packages/events/src/	Events
Admin dashboard application	apps/admin/src/	Frontend

4. Gap Analysis

## 4.1 Role Based Access Control
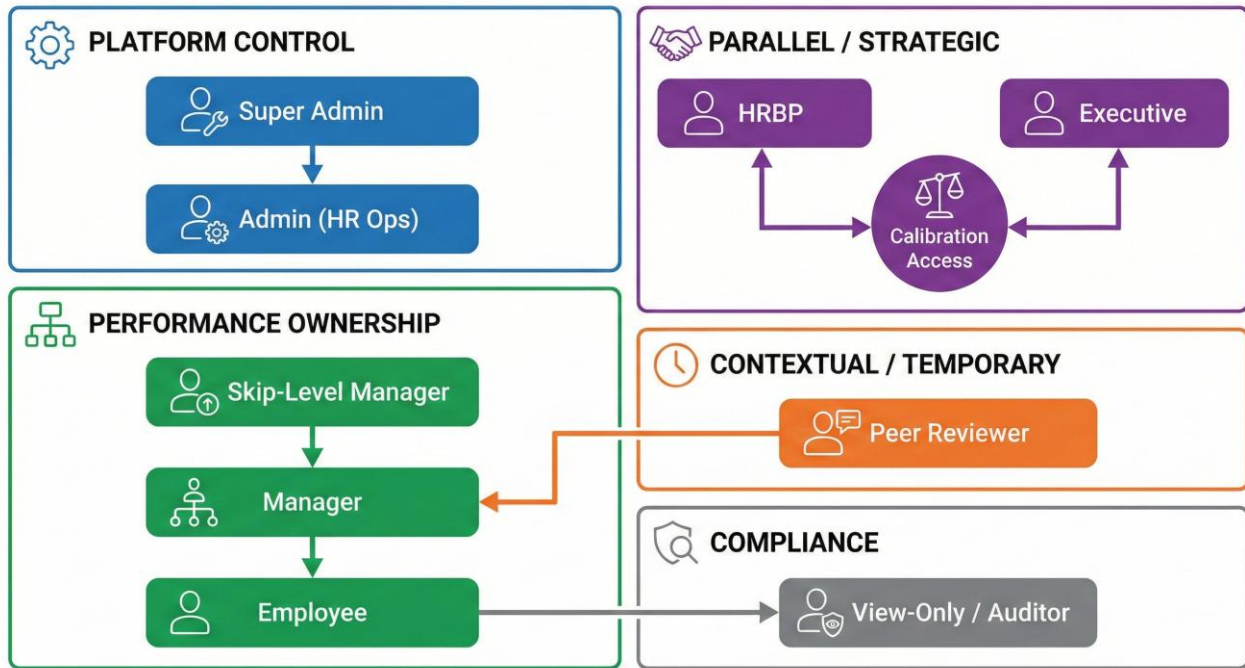

4.2 Completed vs Required

Feature Category	Status	Completion %	Gap Description
Database Schema	COMPLETE	100%	All 50+ models implemented
API Endpoints	MOSTLY COMPLETE	85%	1-on-1 routes pending
Core Algorithms	COMPLETE	80%	Bias detection wiring pending
Frontend Pages	PARTIAL	70%	Analytics widgets pending
Monitoring (Hourly/Daily)	NOT STARTED	0%	Aggregation jobs needed
Monitoring (Weekly/Monthly/Yearly)	NOT STARTED	0%	Aggregation jobs needed
Gantt Charts	NOT STARTED	0%	Component + API needed
Timeline Visualizations	NOT STARTED	0%	Component + API needed
Calendar Views	NOT STARTED	0%	Component + API needed
Heatmaps	NOT STARTED	0%	Component + API needed
20+ Analytics Tools	PARTIAL	10%	Most tools pending
External Integrations	STUBBED	30%	Email/Slack/Teams pending

4.2 Critical Gaps to Address

1. Monitoring Infrastructure - No aggregation jobs exist for hourly/daily/weekly/monthly/yearly metrics
2. Visualization Components - Gantt, timeline, calendar, and heatmap components not implemented
3. Analytics Toolkit - Only basic analytics exist; 20+ tools specification requires significant work
4. External Integrations - Email, Slack, Teams delivery currently logs only
5. Executive Dashboards - Role-based dashboards not yet created

5. 30-Day Execution Plan

Project Timeline (Gantt Chart):

PMS Platform - 30-Day Execution Plan Gantt Chart
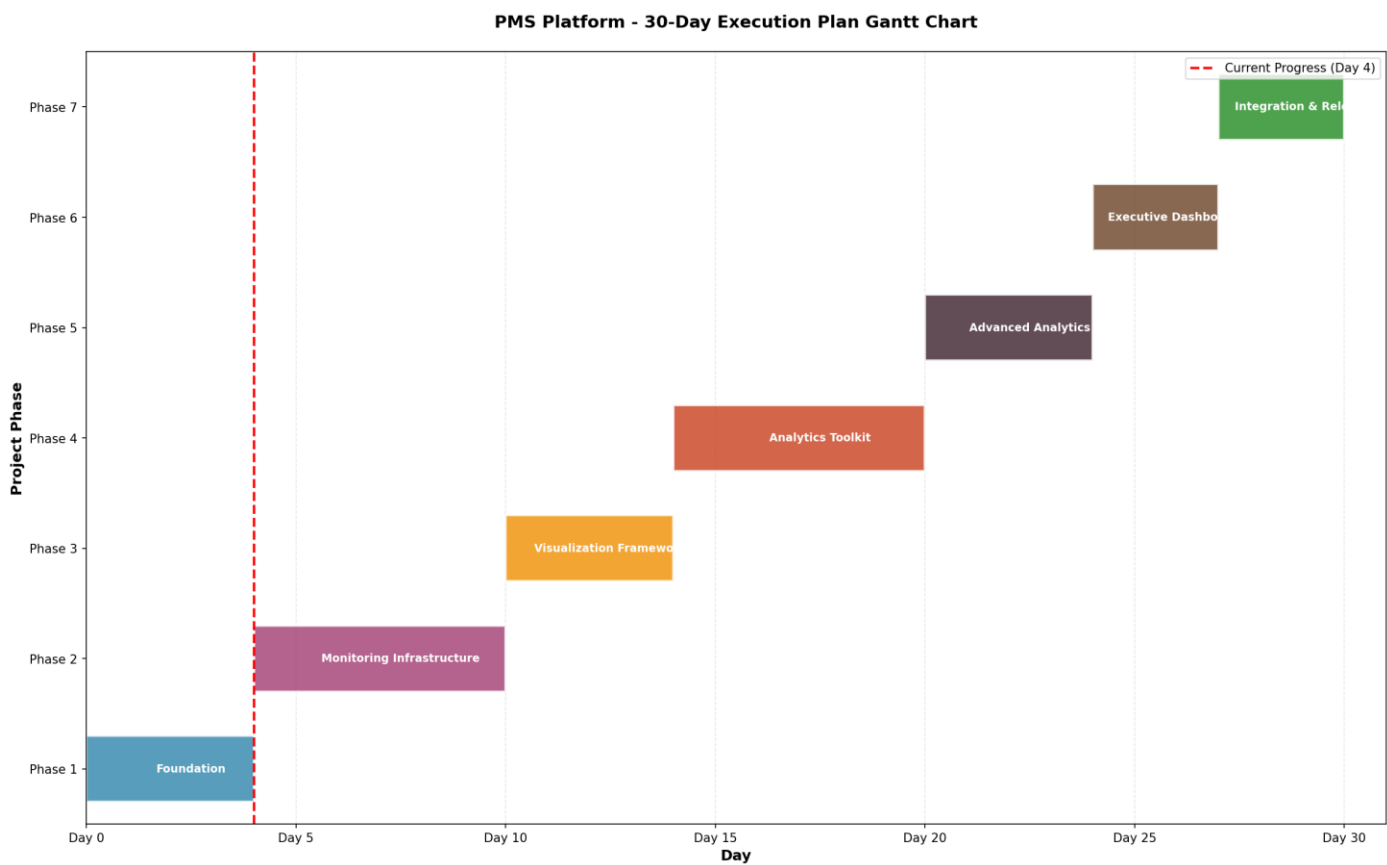

Weekly Calendar Overview:

30-Day Execution Calendar Overview
5.1 Daily Task Breakdown

Day	Date	Member A	Member B	Member C	Status
Day 1	Feb 02	Project Foundation & Architecture	Planning	Documentation	✓
Day 2	Feb 03	API Module Implementation	Planning	DevOps setup	✓
Day 3	Feb 04	Core Algorithms & Advanced Features	Frontend setup	DevOps setup	✓

Day 30	Mar 03	Post-deployment monitoring and hotfixes	User training materials and videos	Release notes and handoff documentation	○

6. Weekly Milestones

Week 1 (Days 1-7)

Milestone: Foundation & Monitoring Infrastructure
Deliverables:
• Multi-tenant database schema complete
• 13 API modules implemented
• Hourly and daily aggregation jobs running
• Basic frontend pages functional
Success Criteria: Core platform operational with basic monitoring

Week 2 (Days 8-14)

Milestone: Monitoring Completion & Visualization Framework
Deliverables:
• Weekly/monthly/yearly aggregation complete
• Gantt chart component implemented
• Timeline visualization implemented

• Calendar heatmap view implemented
Success Criteria: All monitoring cadences operational, visualization components ready

Week 3 (Days 15-21)

Milestone: Analytics Toolkit (14 tools)
Deliverables:
• KPI trend analysis, Goal variance
• OKR completion, Skills gap analysis
• 9-box grid, Distribution curves
• Risk proxy dashboards (burnout, attrition)
Success Criteria: 14+ analytics tools functional with real data

Week 4 (Days 22-28)

Milestone: Advanced Analytics & Executive Dashboards
Deliverables:
• 20+ analytics tools complete
• Executive command center
• Manager operations dashboard
• Employee personal portal
Success Criteria: Role-based dashboards showing relevant metrics

Week 5 (Days 29-30)
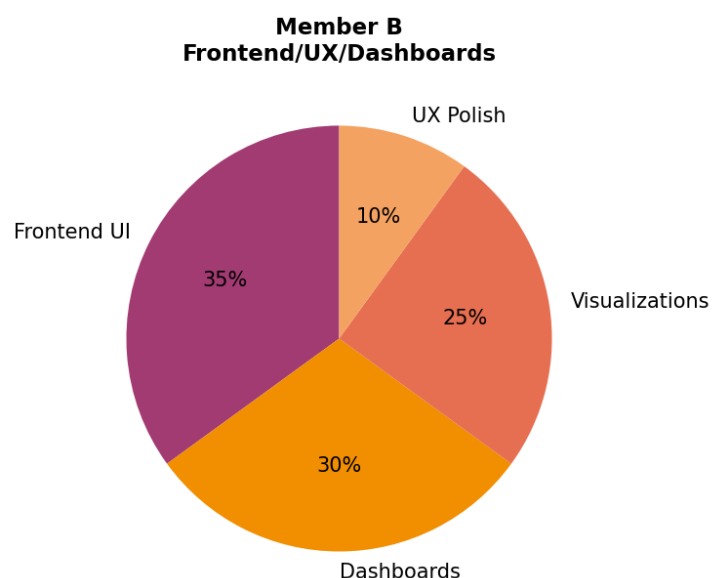

Milestone: Integration & Release
Deliverables:
• External integrations (email, Slack)
• Production deployment
• Documentation complete
• Training materials ready
Success Criteria: System deployed, documented, and operational

## 7. Visualization Roadmap

Team Role Allocation:

Member A
Backend/DB/APIs

Backend APIs 40%
Security 15%
Scheduling 20%
Database 25%

Member B
Frontend/UX/Dashboards

Frontend UI 35%
UX Polish 10%
Visualizations 25%
Dashboards 30%
**Member C
QA/DevOps/Docs**

Feature Implementation Progress:
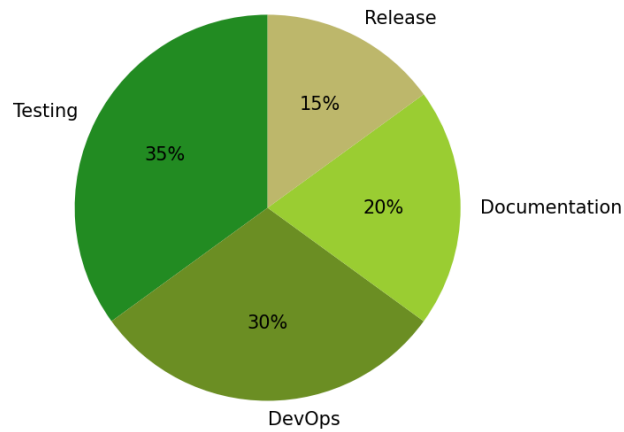

Feature Implementation Progress (Day 4)

7.1 Visualization Components to Implement

Component	Description	Implementation Day	Owner
Interactive Gantt Chart	Goal/project timelines with dependencies	Day 11	B
Career Timeline	Employee progression visualization	Day 12	B
Calendar Heatmap	Activity intensity by date	Day 13	B
Performance Heatmap	Rating distribution heatmap	Day 14	B
Skills Heatmap	Competency level visualization	Day 14	B
9-Box Grid	Performance vs Potential matrix	Day 18	B
Network Graph	Peer feedback relationships	Day 19	B
Distribution Curves	Bell curve for ratings	Day 18	B
Radar Charts	Multi-dimensional performance	Day 26	B
Sankey Diagrams	Resource flow visualization	Day 25	B

8. Analytics Toolkit (20+ Tools)

The following analytics tools will be implemented to provide comprehensive insights:

SI. No.	Tool Name	Description	Day	Status
1	KPI Trend Analysis	Track KPI trends over time with forecasting...	15	Planned
2	Goal Progress Variance	Compare planned vs actual goal progress...	15	Planned
3	OKR Completion Rate	Measure OKR achievement rates by team/dept...	16	Planned
4	Skills Gap Analysis	Identify skill gaps across roles and teams...	16	Planned
5	Competency Heatmap	Visual heatmap of competency levels...	17	Planned
6	Manager vs Team Distribution	Compare manager ratings to team averages...	17	Planned
7	9-Box Grid Mapping	Talent mapping on performance/potential grid...	18	Planned
8	Performance Distribution Curve	Bell curve distribution of ratings...	18	Planned
9	Review Sentiment Summary	AI-powered sentiment analysis of review text...	19	Planned
10	Peer Feedback Network Map	Network graph of feedback relationships...	19	Planned
11	Time-to-Goal Completion	Track average time to complete goals...	20	Planned
12	Late Check-in Detection	Identify employees with missed check-ins...	20	Planned
13	Burnout Risk Proxy Dashboard	Proxy indicators for potential burnout...	21	Planned
14	Attrition Risk Proxy Dashboard	Proxy indicators for attrition risk...	21	Planned
15	High Performer Identification	Identify and highlight top performers...	22	Planned
16	Underperformance Early Warning	Early detection of performance decline...	22	Planned
17	Training Impact Analysis	Measure performance impact of training...	23	Planned
18	Promotion Readiness Score	Detailed breakdown of promotion criteria...	23	Planned
19	Department Comparison Dashboard	Cross-department performance comparison...	24	Planned
20	Custom Report Builder	Drag-and-drop custom analytics reports...	24	Planned
21	Export Dashboards (CSV/PDF)	Export any dashboard to CSV or PDF...	17	Planned
22	Real-Time Leaderboard	Gamified performance rankings...	25	Planned
23	Performance Forecast Graphs	AI-powered performance predictions...	25	Planned

9. Universal Features

The PMS Platform implements the following 50 universal features for organizational excellence:

Real-Time Performance Tracking (1-8)

1. Hourly Performance Tracker

2. 24/7 Activity Monitor with AI Detection

3. Real-Time Goal Progress Dashboard

4. Deadline Proximity Alert System

5. Live Workload Distribution Analyzer

6. Instant Performance Anomaly Detector

7. Real-Time Communication Sentiment Gauge

8. Live Project Milestone Tracker

Periodic Analytics & Reporting (9-13)

1. Weekly Performance Summary with Trend Analysis

2. Monthly Performance Card Generation

3. Quarterly Business Review Engine

4. Yearly Performance Index Report

5. Comparative Period-over-Period Analytics

Visualization & Dashboard Features (14-28)

1. Interactive Executive Dashboard

2. Hierarchical Gantt Chart Generator

3. Interactive Timeline Visualization

4. Custom Calendar Heatmap View

5. Department-Wide Scorecard Dashboard

6. Role-Based Performance Radar Charts

7. Real-Time Analytics Notification Board

8. Multi-Level KPI Tree Visualization

9. Burndown & Burnup Chart Generator

10. Performance Distribution Box Plot Dashboard

11. Real-Time Leaderboard & Ranking Display

12. Geographic Performance Heat Map

13. Sankey Diagram for Resource Flow

14. Custom Widget Builder Dashboard

15. Performance Trend Line & Forecast Graphs

360° & Multi-Perspective Appraisal (29-34)

1. Intelligent 360° Feedback Collector

2. Peer Group Review Module

3. AI-Powered Self-Evaluation System

4. Stakeholder Impact Assessment Tool

5. Anonymous Feedback Aggregation Engine

6. Cross-Hierarchical Appraisal Comparison

Evaluation & Assessment Modules (35-40)

1. Technological Performance Audit Tool

2. Project Evaluation Framework

3. Leadership Competency Evaluator

4. Behavioral Competency Scorer

5. Compliance & Risk Assessment Module

6. Innovation Contribution Tracker

AI-Driven Insights & Intelligence (41-45)

1. Sentiment Analysis of Work Communications

2. Productivity Prediction Engine

3. Engagement Scoring Algorithm

4. Anomaly Detection & Risk Flagging

5. AI-Powered Performance Benchmarking

Actionable Insights & Planning (46-50)

1. Automated Promotion & Succession Recommendation

2. Personalized Development Plan Generator

3. Team Formation & Restructuring Optimizer

4. Performance Improvement Plan (PIP) Automation

5. Organizational Health & Culture Diagnostics Dashboard

REAL-TIME PERFORMANCE TRACKING (1–8)

Feature	Existing PMS coverage	What's new in our spec
1) Hourly Performance Tracker	Rare / New	Most tools track weekly check-ins/goals, not hourly rollups.
2) 24/7 Activity Monitor + AI	Rare / New (high sensitivity)	This shifts toward employee monitoring, not classic PMS. Requires consent, policy gates.
3) Real-Time Goal Progress Dashboard	Common	Standard goal tracking, dashboards exist broadly.
4) Deadline Proximity Alerts	Partial	Some do reminders, but "probability forecasts" is more advanced.
5) Live Workload Distribution	Partial	Often appears via integrations (Jira/Asana), not native PMS.
6) Instant Anomaly Detection	Partial	"AI insights" exist, but real-time anomaly detection is uncommon.
7) Real-Time Communication Sentiment	Rare / New (high sensitivity)	Not standard PMS because of privacy and trust.
8) Live Project Milestone Tracker	Partial	Usually via PM-tool integrations, not core PMS.

Summary: Existing PMS is already strong at #3; our novelty is #1, #2, #6, #7 (but #2 and #7 are the most adoption-sensitive).

PERIODIC ANALYTICS & REPORTING (9–13)

These are **mostly "Common"** in existing enterprise PMS suites: goals, reviews, check-ins/feedback, and cadence-based reporting are baseline expectations.

Feature	Existing PMS coverage	What's new in our spec
9) Weekly summary + trends	Common	Mostly packaging + better visuals
10) Monthly performance card	Common/Partial	Often "reports," not always "cards"
11) Quarterly business review engine	Partial	Usually manual exports or HR dashboards
12) Yearly performance index	Common	Standard review-cycle output
13) Period-over-period analytics	Partial	Often limited comparisons; you want richer analytics

Summary: Not novel, but absolutely necessary for enterprise credibility.

VISUALIZATION & DASHBOARDS (14–28)

Existing platforms do have dashboards and visualizations (including filters and executive views).
Our list goes much deeper into "analytics studio" territory.

Feature	Existing PMS coverage	What's new in our spec
14) Executive dashboard	Common	Better drill-down and layout control
15) Gantt generator	Partial	Often not native PMS (more PM tools)
16) Timeline visualization	Partial	Usually limited to review history timelines
17) Calendar heatmap	Rare / New	Heatmaps are more advanced analytics
18) Dept scorecard	Common	Typical HR analytics view
19) Radar charts	Partial	Some have competency views; radar is less common
20) Notification board	Partial	Alerts exist; "board" UX is new packaging
21) KPI tree	Rare / New	Strong differentiator if done well
22) Burndown/burnup	Rare / New	More Agile/PM than PMS
23) Box plots	Rare / New	Statistical charts are not common in PMS UI
24) Leaderboard	Partial	Some gamification exists; enterprise adoption varies
25) Geographic heat map	Rare / New	Useful only for multi-site orgs
26) Sankey	Rare / New	Advanced, niche but impressive
27) Custom widget builder	Rare / New	Very strong differentiator, also high effort
28) Trend + forecasts	Partial	Trends exist; forecasting is more advanced

Summary: Our biggest "new" surface is #21, #27, plus the advanced chart suite (#23, #26). This is where you can claim "paradigm shift" if the UX stays simple.

360° & MULTI-PERSPECTIVE APPRAISAL (29–34)

This area is **largely Common** in established performance platforms: 360 feedback, peer feedback, self reviews, structured cycles.

Our novelty here is less about existence and more about **automation quality**, anonymity controls, and cross-view comparisons.

EVALUATION & ASSESSMENT MODULES (35–40)

Feature	Existing PMS coverage	What's new in our spec
35) Technological performance audit	Rare / New	This is closer to skills analytics + tool telemetry
36) Project evaluation framework	Partial	Often done via OKRs and review forms
37) Leadership evaluator	Common/Partial	Common in talent suites, not always SMB PMS
38) Behavioral competency scorer	Common/Partial	Usually rubric-based, not AI-scored
39) Compliance & risk assessment	Partial	More common in regulated-industry HCM suites
40) Innovation tracker	Rare / New	Usually informal, not systematized

Summary: #35 and #40 are more "new." Others exist, but our differentiation is depth and instrumentation.

AI-DRIVEN INSIGHTS & INTELLIGENCE (41–45)

AI is showing up in performance tools as "AI-driven insights" and "skills intelligence," especially in large suites and add-ons.
But our list goes further into sensitive territory.

Feature	Existing PMS coverage	What's new in our spec
41) Work communications sentiment	**Rare / New (high sensitivity)**	Privacy, policy, consent required
42) Productivity prediction	**Partial**	Possible, but depends on data quality
43) Engagement scoring	**Partial**	Exists, but definitions vary
44) Risk flagging (burnout/attrition proxies)	**Partial**	Some vendors do it, but heavily governed
45) AI benchmarking	**Partial**	Appears as "insights," not always transparent

ACTIONABLE INSIGHTS & PLANNING (46–50)

These are common in "performance + talent" platforms, especially development plans and PIPs.
The most aggressive items are succession and restructuring optimization.

Feature	Existing PMS coverage	What's new in our spec
46) Promotion & succession recommendations	**Partial**	More talent-management than pure PMS
47) Personalized development plans	**Common/Partial**	Better automation and tracking
48) Team formation optimizer	**Rare / New**	High ambition, high governance needs
49) PIP automation	**Common/Partial**	Very useful if done with evidence trails
50) Org health & culture diagnostics	**Partial**	Often comes from engagement modules and surveys

10. Universal Selling Points

Clear USPs: 16

These are the ones that most PMS products do not ship natively, or they ship only in a much weaker form.

1. **High-frequency + real-time intelligence**
   1. Hourly Performance Tracker
   2. 24/7 Activity Monitor with AI Detection (high-risk, needs policy gating)
   3. Live Workload Distribution Analyzer
   4. Instant Performance Anomaly Detector
2. **Deep visualization studio (beyond normal dashboards)**
   1. Hierarchical Gantt Chart Generator
   2. Custom Calendar Heatmap View
   3. Multi-Level KPI Tree Visualization

4. Performance Distribution Box Plot Dashboard

5. Sankey Diagram for Resource Flow

6. Custom Widget Builder Dashboard

7. Performance Trend Line & Forecast Graphs

3. **Non-standard assessment instrumentation**

   [1] Technological Performance Audit Tool

   [2] Innovation Contribution Tracker

4. **Advanced optimization and prediction**

   [1] Productivity Prediction Engine

   [2] Anomaly Detection & Risk Flagging (burnout/attrition proxies, high-risk)

   [3] Team Formation & Restructuring Optimizer (high-risk)

Secondary USPs: 6

Differentiating in packaging or depth, but you will see versions of these in some platforms.

[1] **Real-Time Communication Sentiment Gauge / Work-Comms Sentiment** (high-risk)

[2] **Geographic Performance Heat Map**

[3] **Burndown & Burnup Chart Generator**

[4] **AI-Powered Performance Benchmarking**

[5] **Quarterly Business Review Engine** (often exists as reports, not "engine")

[6] **Comparative Period-over-Period Analytics** (often shallow elsewhere)

Table-stakes or common: 28

These are important, but not unique: goal dashboards, deadline reminders, milestone tracking, weekly/monthly/yearly reporting, executive/department scorecards, 360 feedback, peer/self reviews, PIP automation, development plans, org health dashboards, leadership/behavior/compliance modules (in some form).

---

11. Risks, Dependencies & Mitigations

11.1 Technical Risks

Risk	Impact	Probability	Mitigation
Aggregation job performance	HIGH	MEDIUM	Use batching, indexing, partitioning
Real-time sync latency	MEDIUM	LOW	Redis pub/sub with message queuing
Visualization rendering performance	MEDIUM	MEDIUM	Virtualization, lazy loading
External API rate limits	LOW	HIGH	Implement retry logic with backoff
Data migration complexity	HIGH	LOW	Comprehensive migration scripts, backups

10.2 Dependencies

Dependency	Required For	Status	Alternative
PostgreSQL 14+	Database	READY	None (required)
Redis 7+	Caching/Pub-Sub	READY	In-memory fallback
Node.js 18+	Runtime	READY	None (required)
SendGrid/SES	Email notifications	CONFIG NEEDED	SMTP server
Slack Bot Token	Slack integration	CONFIG NEEDED	Webhook fallback
MS Teams Webhook	Teams integration	CONFIG NEEDED	None

12. Appendix

12.1 API Endpoints Summary

Module	Base Route	Endpoint Count	Status
Authentication	/api/v1/auth	8	Complete
Users	/api/v1/users	12	Complete
Goals	/api/v1/goals	10	Complete
Reviews	/api/v1/reviews	15	Complete
